UNIVERSE NEO

EASY-UP

We would like to introduce you our exclusive range of pool enclosures from Alukov company. This range was specifically designed for customers who want to combine comfort of the swimming in the enclosed swimming pool with aesthetics and the highest quality.

This has resulted in a comprehensive range of models, characterized by its round shaped profiles that meets the highest safety and aesthetic requirements in terms of stability and durability. Each NEO series, except for the IMPERIA NEO - light model, is complemented by a new more comfortable EASY UP. Thanks to EASY UP you are able to safely and quickly close the enclosure without the need for uncomfortable bending

AIR FRESH SYSTEM

This unique technology allows you to comfortably regulate the access of the fresh air to the pool without a need to move the segments of enclosure thus preventing a child or a pet falling into the pool.

HOW DOES IT WORK

Would you like to enjoy the comfort of swimming under the pool enclosure, but don't want to miss out on the view from your window? Then our low pool enclosures are just the thing for you! Due to their height, they do not interfere with the view of the garden and are still high enough to be able to swim comfortably underneath when the pool enclosure is closed.

UNIVERSE

The models within this series have been meticulously crafted by ALUKOV's design engineers to seamlessly blend the advantages of both low and high enclosures into a singular, harmonious design. This particular variant caters to customers seeking a solution that not only preserves the aesthetic balance of the garden but also provides ample freedom of movement within the central area of the enclosed pool.

PREMIUM HIGH POOL ENCLOSURES

RAVENA

OLYMPIC

LAGUNA

ORIENT

Hurray for unrestricted movement under the entire enclosure! This advantage is made possible by (almost) vertical side walls, depending on the model. The high-quality and proven sliding system ensures easy sliding of the enclosure in both directions. If the rails are extended the entire enclosure can even be pushed away off the pool. This creates a space protected from the wind usable for garden furniture or for relaxing in the immediate vicinity of the pool!

SLIDING PATIO ENCLOSURE CORSO

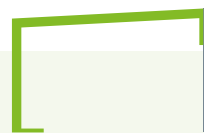

The sliding enclosure CORSO™ is an ideal solution for extending the interior, your terrace or as an enclosure for a swimming pool located near a building. The space thus covered remains easily and comfortably accessible from all sides. The individual segments can be slid to allow the terrace to be covered or uncovered. It is simple and easy. You can use your terrace even in bad weather, regardless of the season.

CARPORT SINGLE / DOUBLE

A covered parking space for cars is an innovative product in the range of ALUKOV company products, a leading manufacturer of patio and pool enclosures. The construction has been designed to meet both the technical standards as well as the aesthetic design of modern architecture. Strong, solid construction with good anchoring resists strong winds. Your car is well protected in all seasons and weather conditions.

CARPORT CAMPER

CARPORT CAMPER STANDARD

CARPORT CAMPER

provides a covered parking space for caravans. It is suitable for all common types of caravans. Depending on the size of the caravan or motorhome for which it is intended, you can choose from three basic sizes. The structure is made of a roofed aluminium construction that protects the motorhome from weather conditions such as rain, snow or direct sunlight. It offers protection and helps to extend the life of the caravan. The CARPORT CAMPER can stand alone next to the house or be attached to the facade of the building at the same time.
