A RELIABLE AND PATENTED TECHNOLOGY

We are delighted to introduce to you the 'CenturionSeal' pool cover system.

This patented system comprises a unique mechanism that allows the fabric to unroll and lock in place thanks to an extra-flat, extremely discreet, 10 mm thick rail. The fabric was developed by the Serge Ferrari brand, the world leader in this market, for top resistance to UV rays, extreme climatic conditions and the most exacting of standards.

Best of all, not only do they operate superbly in any configuration, they also look fantastic too.

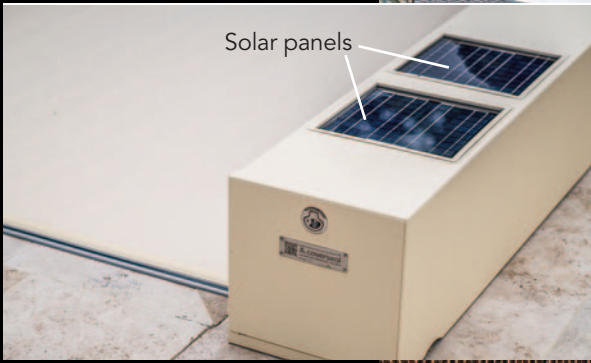

AVAILABLE IN A CHOICE OF COLOURS

Match your cover to your pool with a choice of coloured finishes from our selected range, designed to help blend with your own personal environment. Choose from our RAL colour swatch and match your vinyl finish and box finish to your own personal choice. (The standard box finish is grey as shown above)

Discreet, low profile tracking and cover slats.

Solar panels

The cover is housed within a ventilated box container and can be fitted with optional solar panels to supply the internal batteries meaning no external wiring and even greater power saving.

Perfect for 'shaped' pools too.

STYLISH AND PRACTICAL SOLUTIONS TO ANY POOL COVERING REQUIREMENT

The cost of energy and the desire to be more environmentally friendly are additional reasons to choose a **CenturionSeal** pool cover.

A **CenturionSeal** helps save both water and energy. In winter, our cover will also limit the occurrence of frost and will allow you to protect your pool and its equipment.

A **CenturionSeal** pool cover is also perfect for non-standard sized or 'shaped' pools.

POWER CONTROLLED TO MAKE OPENING
AND CLOSING SIMPLICITY ITSELF!

A **CenturionSeal** pool cover can be supplied in 2 different opening configurations. Choose from a flexible lead electronic remote controlled version, simply walk alongside your cover box as it effortlessly opens. Followed by 'line of site' infra red remote control opening versions. Your budget, your choice.

'Hand crank' safety opening supplied in the event of an electrical power failure.

JUST A FEW OF THE BENEFITS OF A 'CENTURIONSEAL' INSTALLATION

A good pool cover can add so many benefits to maintaining and enjoying your pool. Not just through the summer but during the winter too.

In the summer a **CenturionSeal** pool cover is quick and simple to operate in any of the configurations. It's insulating properties help keep your pool water warmer and therefore help to save on your energy bills.

During the winter it helps maintain your pool water throughout the colder months and stops any potentially harmful debris from entering the pool.

Also the perfect solution for indoor pools.

SAFETY FIRST, LAST AND ALWAYS

The high strength and durability of the Serge Ferrari brand pre-stressed PVC membrane used on every single one of our pool covers enables it to support the weight of one or more people in the event of a fall.

For pool owners with young children and pets this is particularly beneficial and really provides a sense of 'peace of mind'.

VOTED 'POOL CONTRACTOR OF THE YEAR'
AT THE NATIONAL SPATA POOL AWARDS AND WINNER OF 10 INDIVIDUAL AWARDS IN 2022,
